

# The Systemic Impacts of Learning Assistants

Ben Van Dusen<sup>1</sup>, Jada-Simone S. White<sup>1</sup>, Edward A. Roualdes<sup>2</sup>

<sup>1</sup>CSU Chico - Department of Science Education

<sup>2</sup>CSU Chico - Department of Mathematics and Statistics

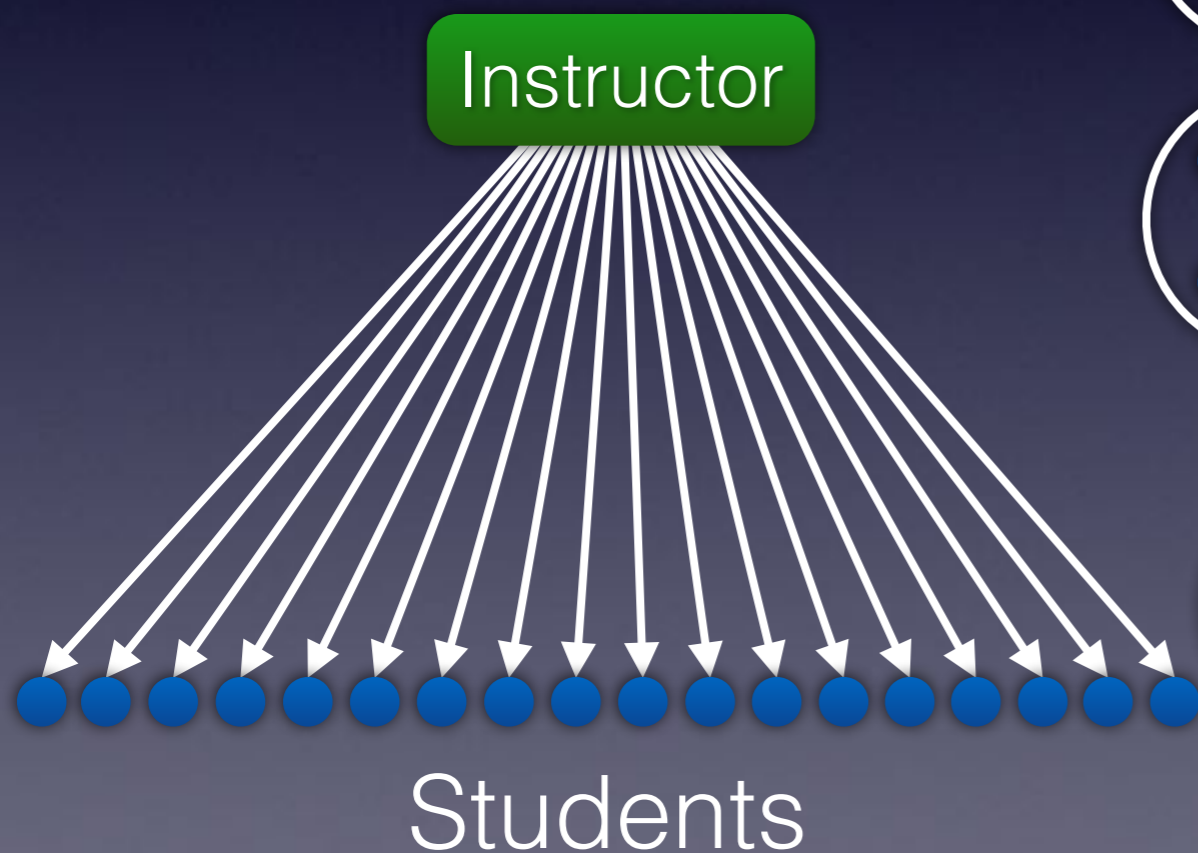

Learning Assistant (LA) Model  
UNIVERSITY OF COLORADO **BOULDER**

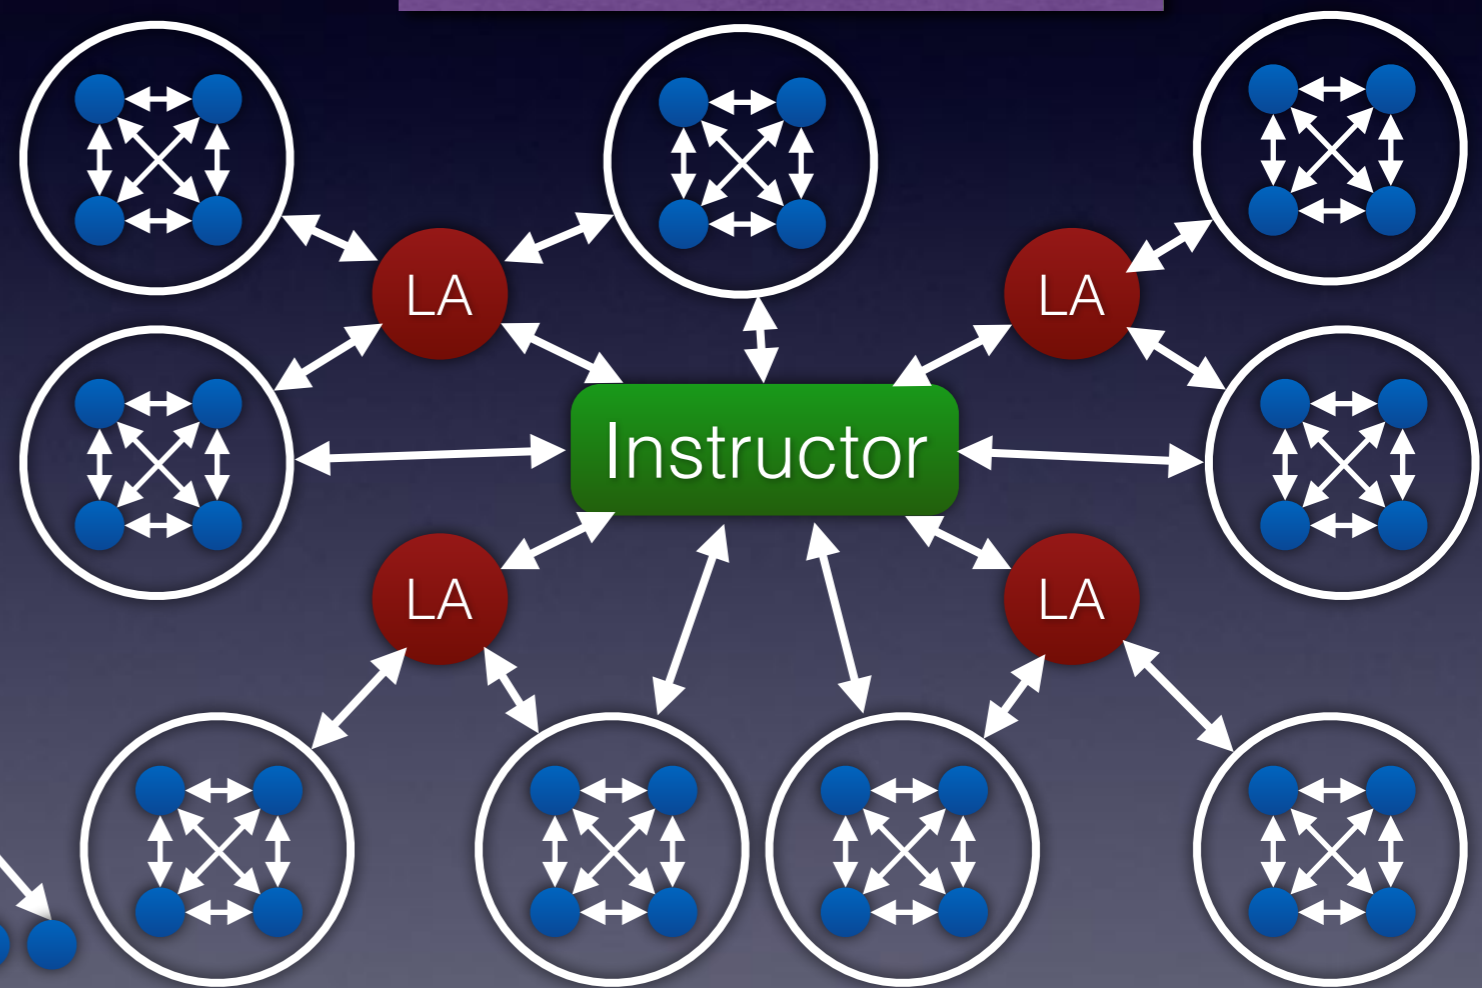

# Learning Assistant Model

Traditional Model

LA Model

Van Dusen, B., Langdon, L., & Otero, V. (2015). Learning Assistant Supported Student Outcomes (LASSO) study initial findings. *Proceeding of the American Association of Physics Teacher*, 343–346.

# LA Experience

**Practice:** Facilitate Small Group Learning

**Content:** Weekly Prep Meeting

- a. What student problems have LAs observed?
- b. What are the critical concepts for the coming week?
- c. Where might students encounter difficulties?

**Pedagogy:** LA Course

- a. How do people learn?
- b. What is wait-time
- c. What are mental models
- d. How do you ask open-ended questions

# LA Program Goals

Discipline-Based  
Education Research

Teacher  
Recruitment &  
Preparation

Transformation  
of Departmental  
Cultures

Undergraduate  
Course Transformation  
using LAs

# Learning Assistant Alliance

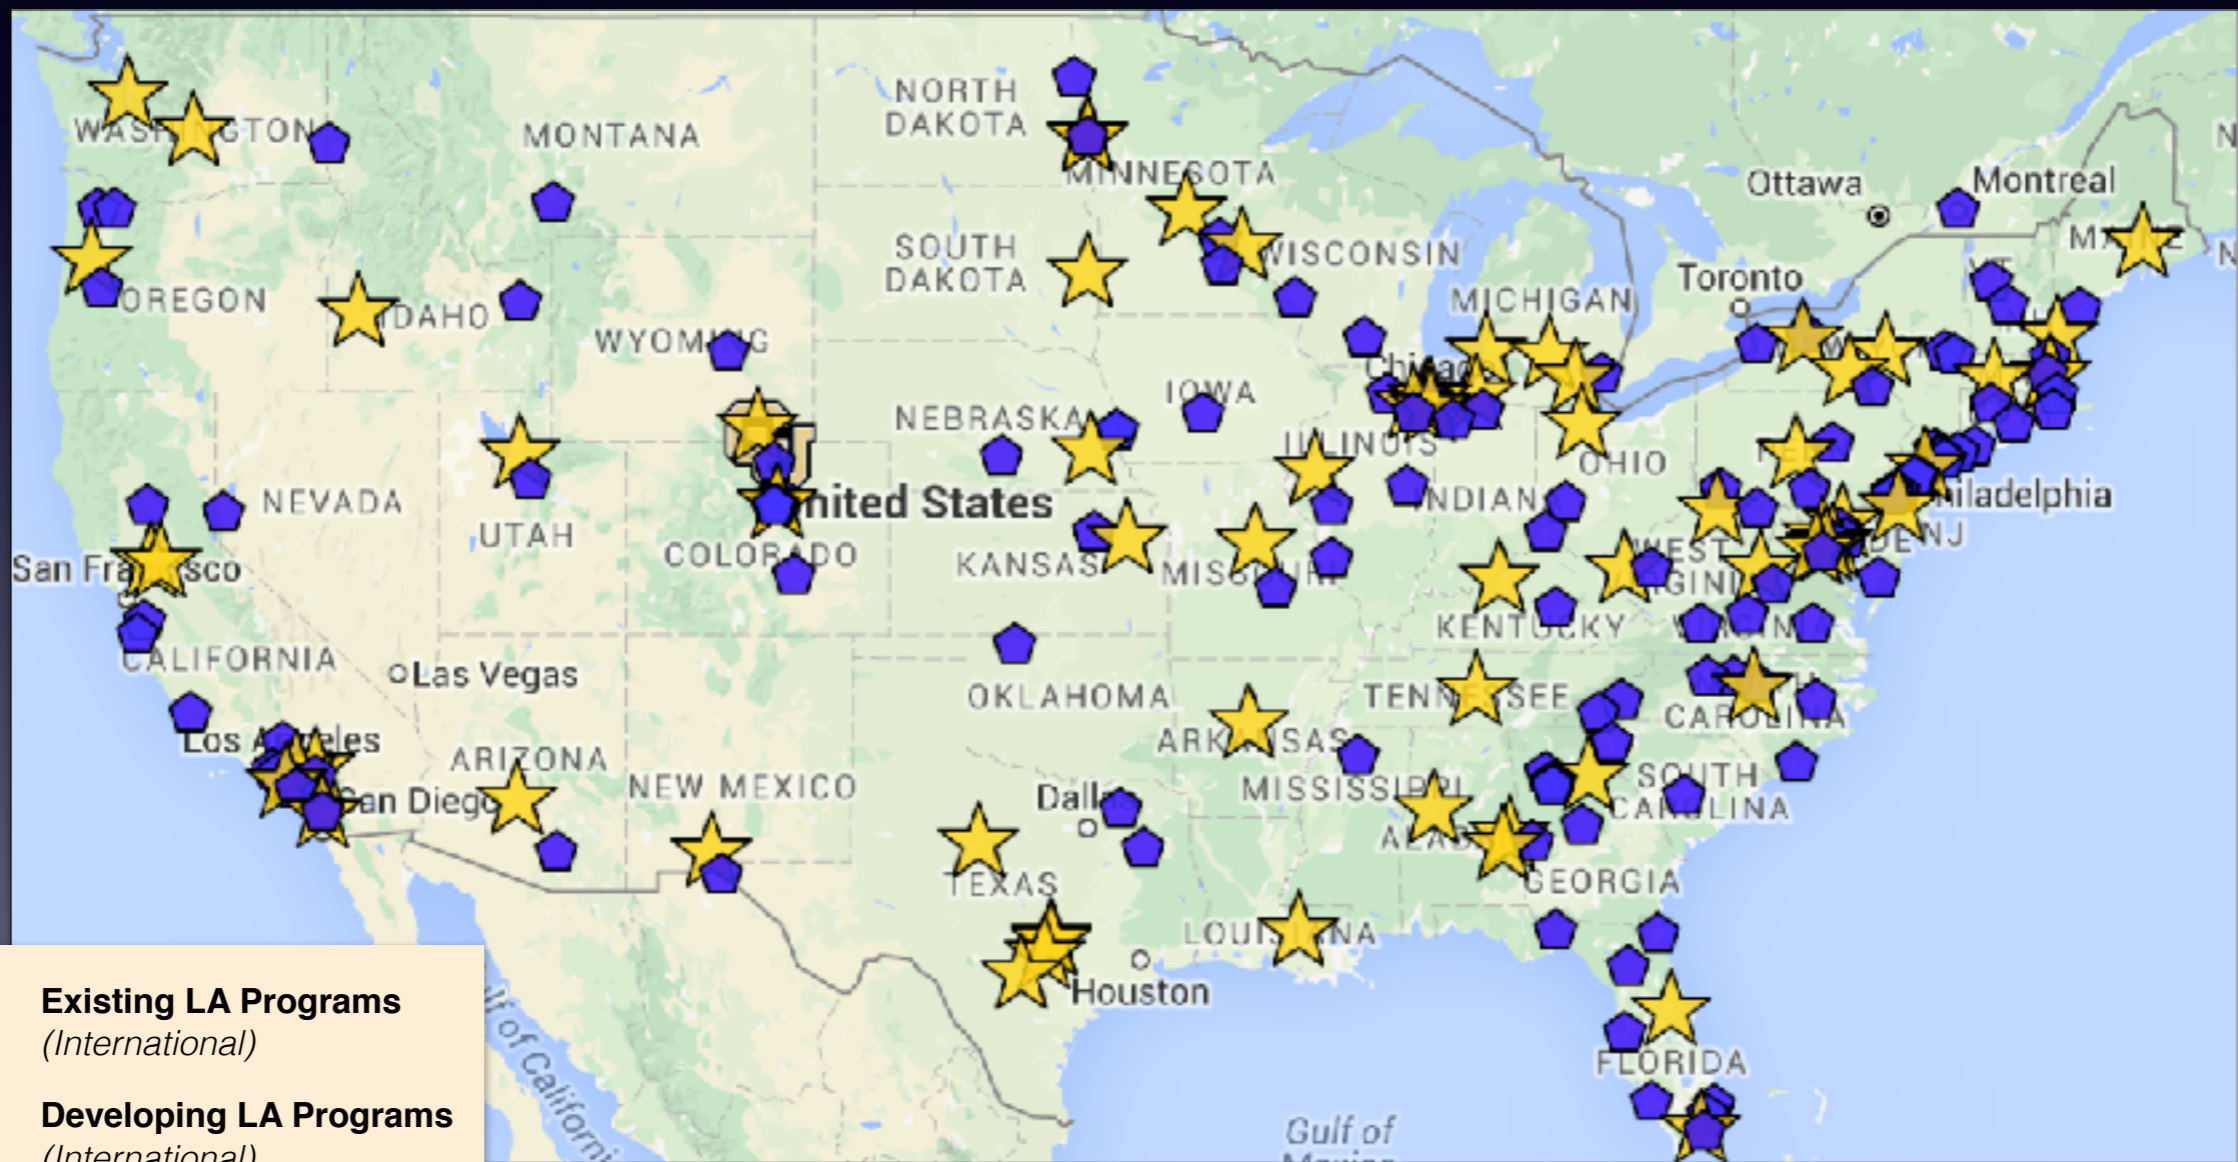

-  **Existing LA Programs**  
*(International)*
-  **Developing LA Programs**  
*(International)*
-  **Developing LA Programs**  
*(National)*

# Chico State (Fall '16)

Department	Courses	Funding Source
Science Education	SCED 141	CRT
Biology	BIO 151	MSTI
Math	MATH 119	CRT/MSTI
Physics	PHYS 202A, 204A	CRT/MSTI

# Measuring impact of LAs on student learning

-  **Existing LA Programs**  
(International)
-  **Developing LA Programs**  
(International)
-  **Developing LA Programs**  
(National)

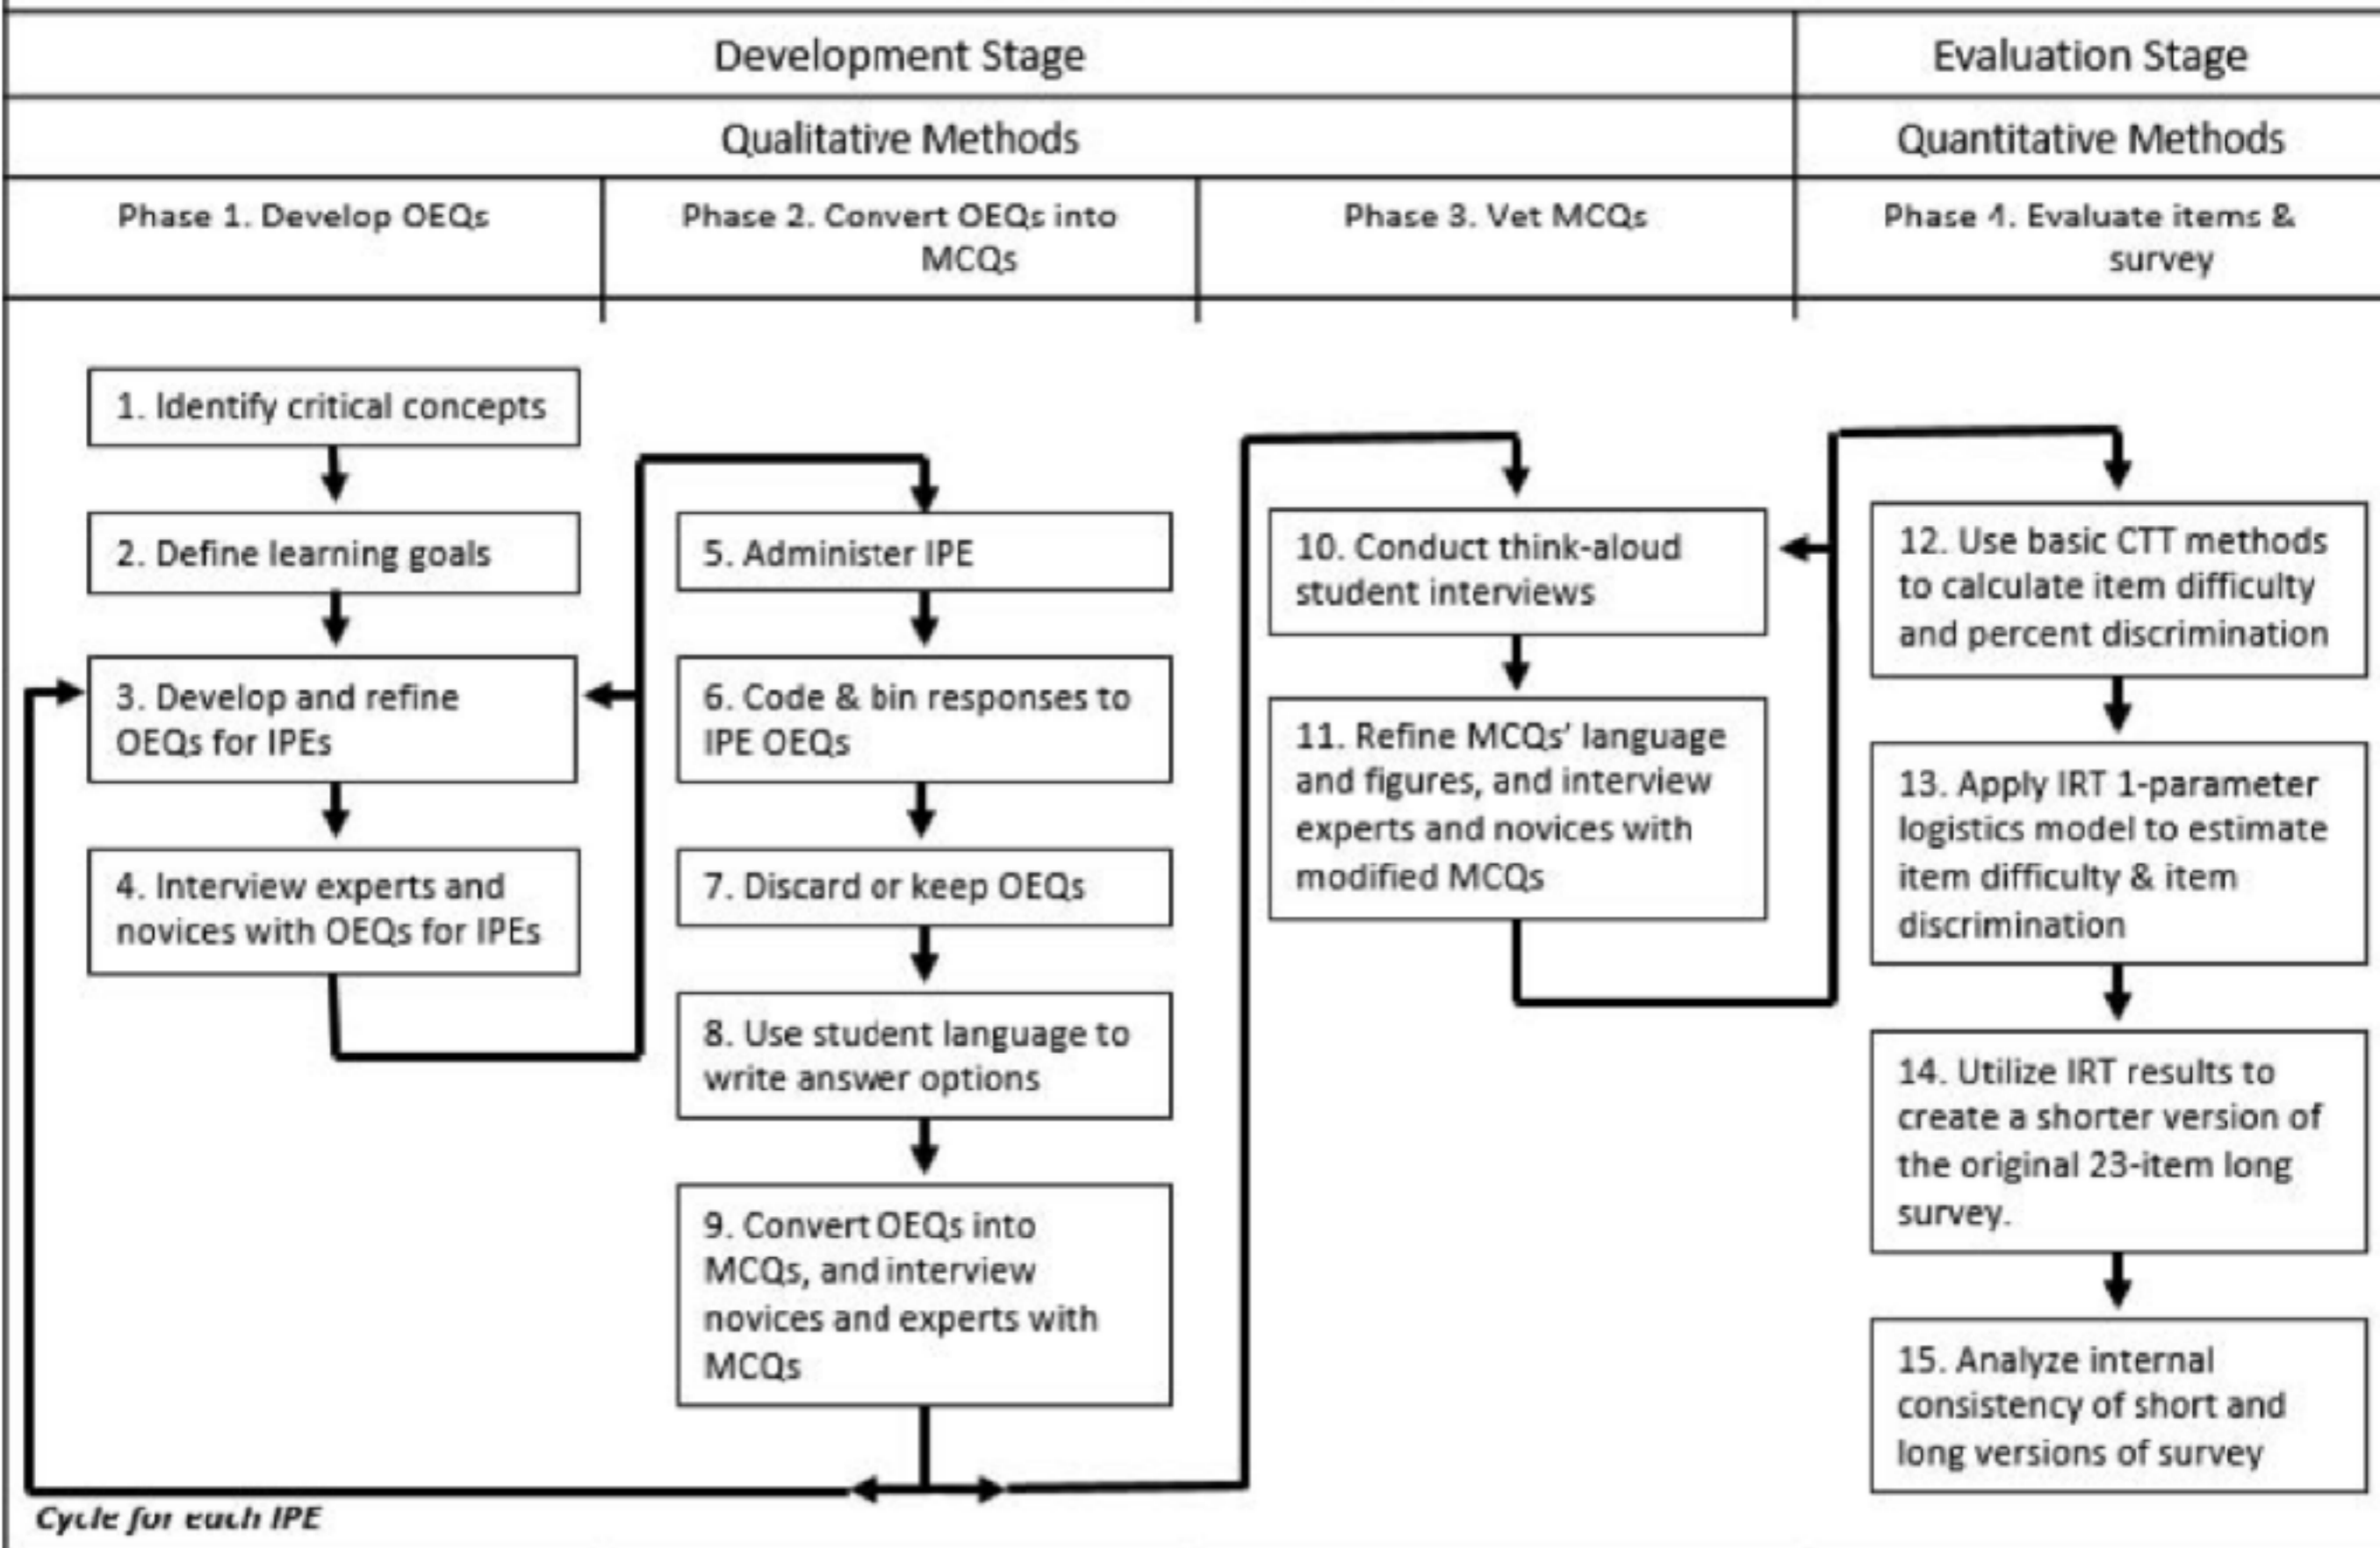

# Concept Inventories vs. Typical tests

- CIs are different from typical tests
  - based on extensive research
  - in students' own words
  - diagnose a specific level of student understanding
- Often have validity arguments
- CIs allow for normative comparisons

# CONSTRUCTION OF OCI

# Examples of Concept Inventory Items

## Force Concept Inventory

6. Which path in the figure at right would the ball most closely follow after it exits the channel at "r" and moves across the frictionless table top?

## Matter and Energy (Biology)

Humans must eat and breathe in order to live and grow. Are eating and breathing related to each other? (Circle one) YES NO

If you circled "Yes" explain how eating and breathing are related. If you circled "No" then explain why they are not related. Give as many details as you can.

# Electricity & Magnetism Conceptual Inventory (F04, S05)

# Literature Review

- 40+ publications
  - Improve learning
    - Physics (Pollock)
    - Chemistry
    - Math (Nelson)
  - Close the achievement gap (Nelson)
  - Improve graduation rates (In preparation)
    - +7% in 1-yr grad rates in >0 LA classes (n=20,642)

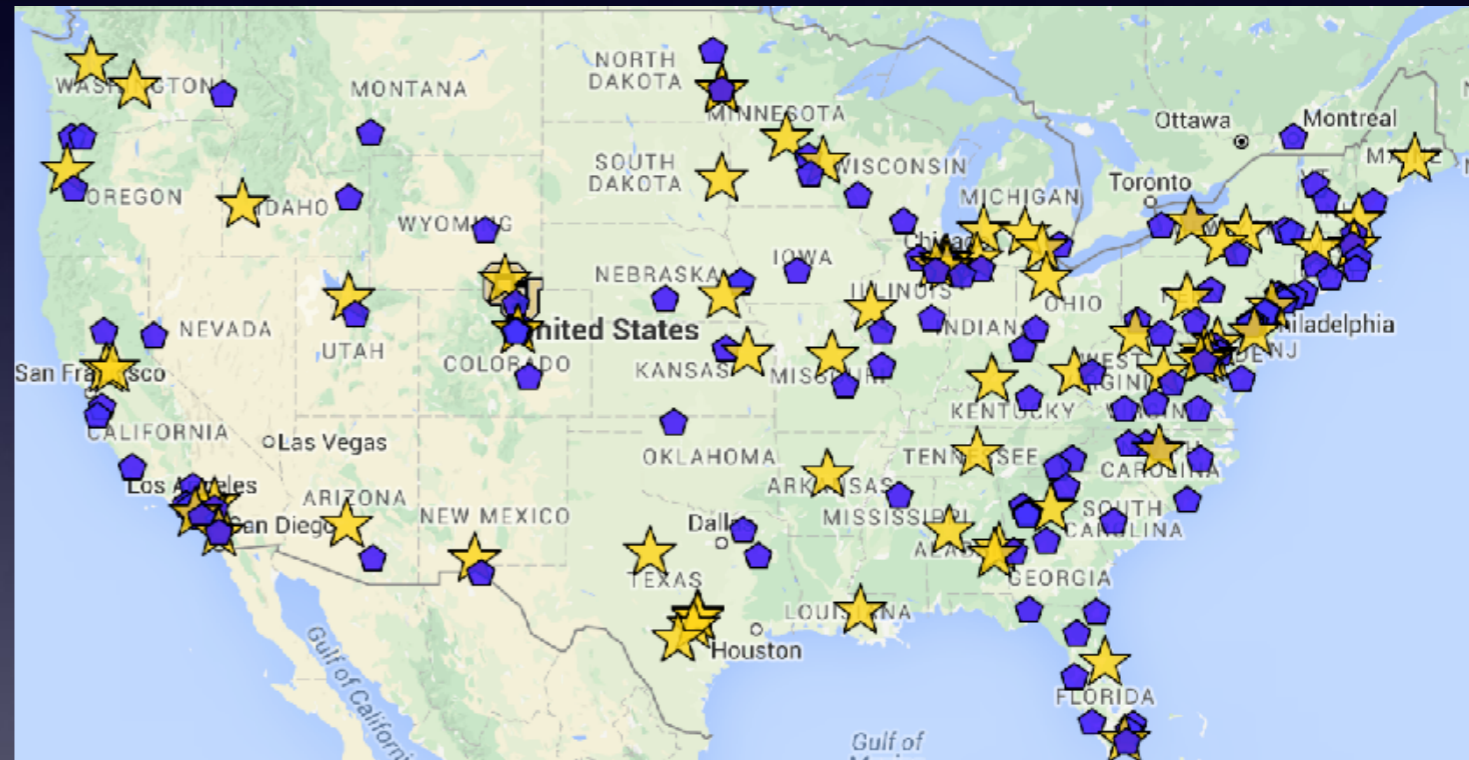

# The Problem

- **Different learning contexts**

- Institution type
- Discipline
- Student populations
- LA uses

- **Problem for users**

- Not enough people use Concept Inventories (CIs)
- Additional time to administer and analyze CIs

**LA Supported Student Outcomes (LASSO) Study**

Assessment: FMCE  
 Institution: LASSO University  
 Course: ABCD 1000 - 001  
 Instructor: Riley Patterson  
 Semester: Fall 2015

Your Data

N (class) = 250  
 N (pre) = 190 (mean = 45%)  
 N (post) = 190 (mean = 75%)  
 N (paired) = 130  
 Learning Gain:  
 (post - pre) / (1 - pre) = 0.55

Effect size (Cohen's d) is a common statistical measure of student improvement. It measures student improvement in units of standard deviations (%post-%pre)/SD<sub>pooled</sub>. To help interpret the magnitude of an effect size, Cohen provided the following guidelines [1]:

Effect Size	Cohen's d
"small"	~0.2 - 0.3
"medium"	~0.5
"large"	~0.8

N (paired) = 130  
 Average Effect Size: 2.11  
 Note: 1 score was less than -1.

**Sample Report**

For more information on interpreting this report, please view our [explanatory screencast](#).

# Learning Assistant Supported Student Outcomes (LASSO)

Discipline	Assessment (Fall '16)
<b>Physics</b>	Force and Motion Concept Evaluation (FMCE)
	Force Concept Inventory (FCI)
	Brief Electricity and Magnetism Assessment (BEMA)
	Conceptual Survey of Electricity and Magnetism (CSEM)
	Colorado Learning Attitudes about Science Survey - Physics (CLASS-PHYS)
<b>Chemistry</b>	Chemistry Concept Inventory (CCI)
	Colorado Learning Attitudes about Science Survey - Chemistry (CLASS-CHEM)
	Concept Inventory of Natural Selection (CINS)
<b>Biology</b>	Genetics Concept Assessment (GCA)
	Introductory Molecular and Cell Biology Assessment (IMCA)
	Colorado Learning Attitudes about Science Survey - Biology (CLASS-BIO)
<b>Math</b>	Pre-Calculus Assessment (PCA)
<b>Astronomy</b>	Light and Spectroscopy Concept Inventory (LSCI)

The LASSO online data collection instrument is free and easy to use!!

# Growth of the LASSO dataset

**# of Institutions**

**# of Courses**

**# of Students w/  
matched pre & post  
tests**

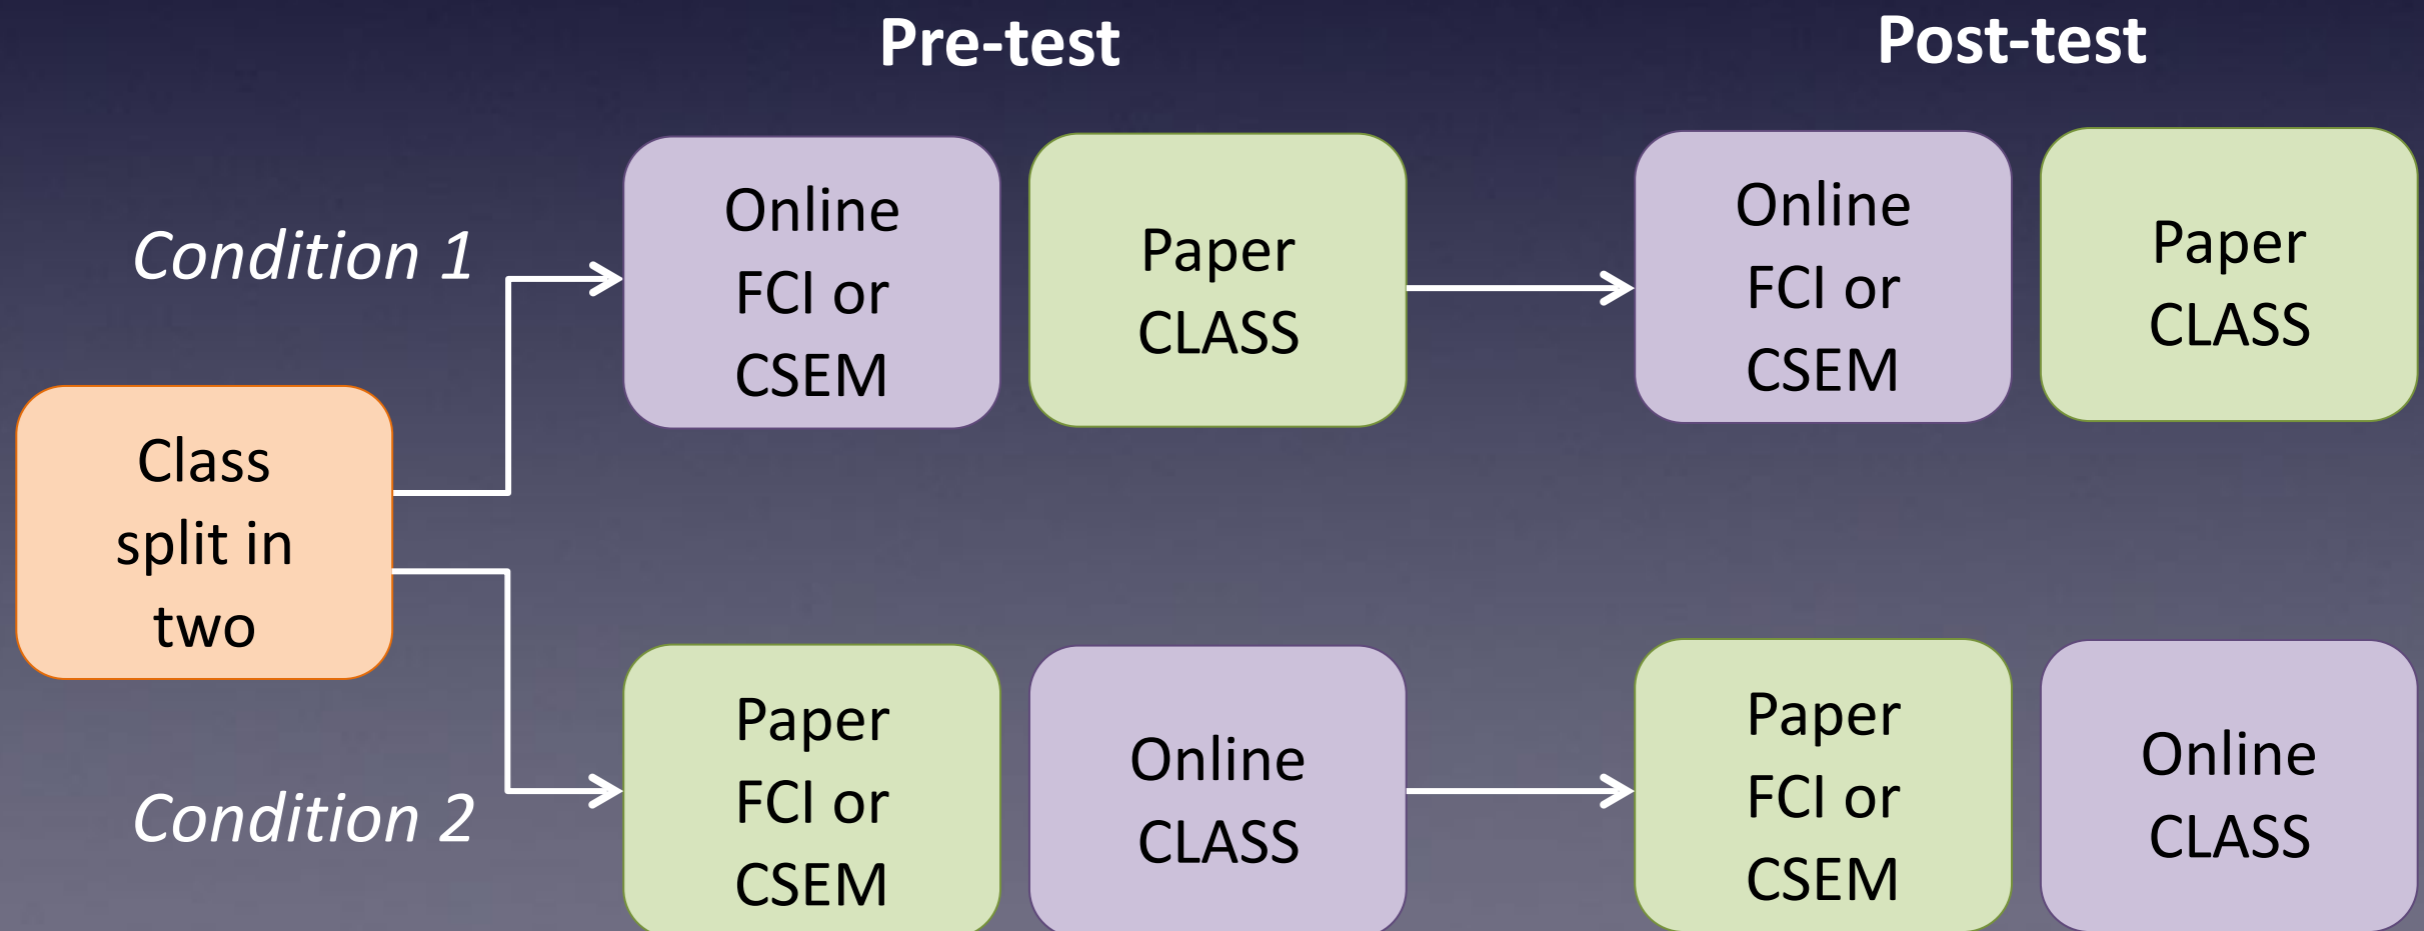

# Research Questions

1. What impacts do online administrations of concept inventories have on students, if any?
2. What impacts do LAs have on student learning, if any?
3. What impacts do LAs have on classroom inequities, if any?

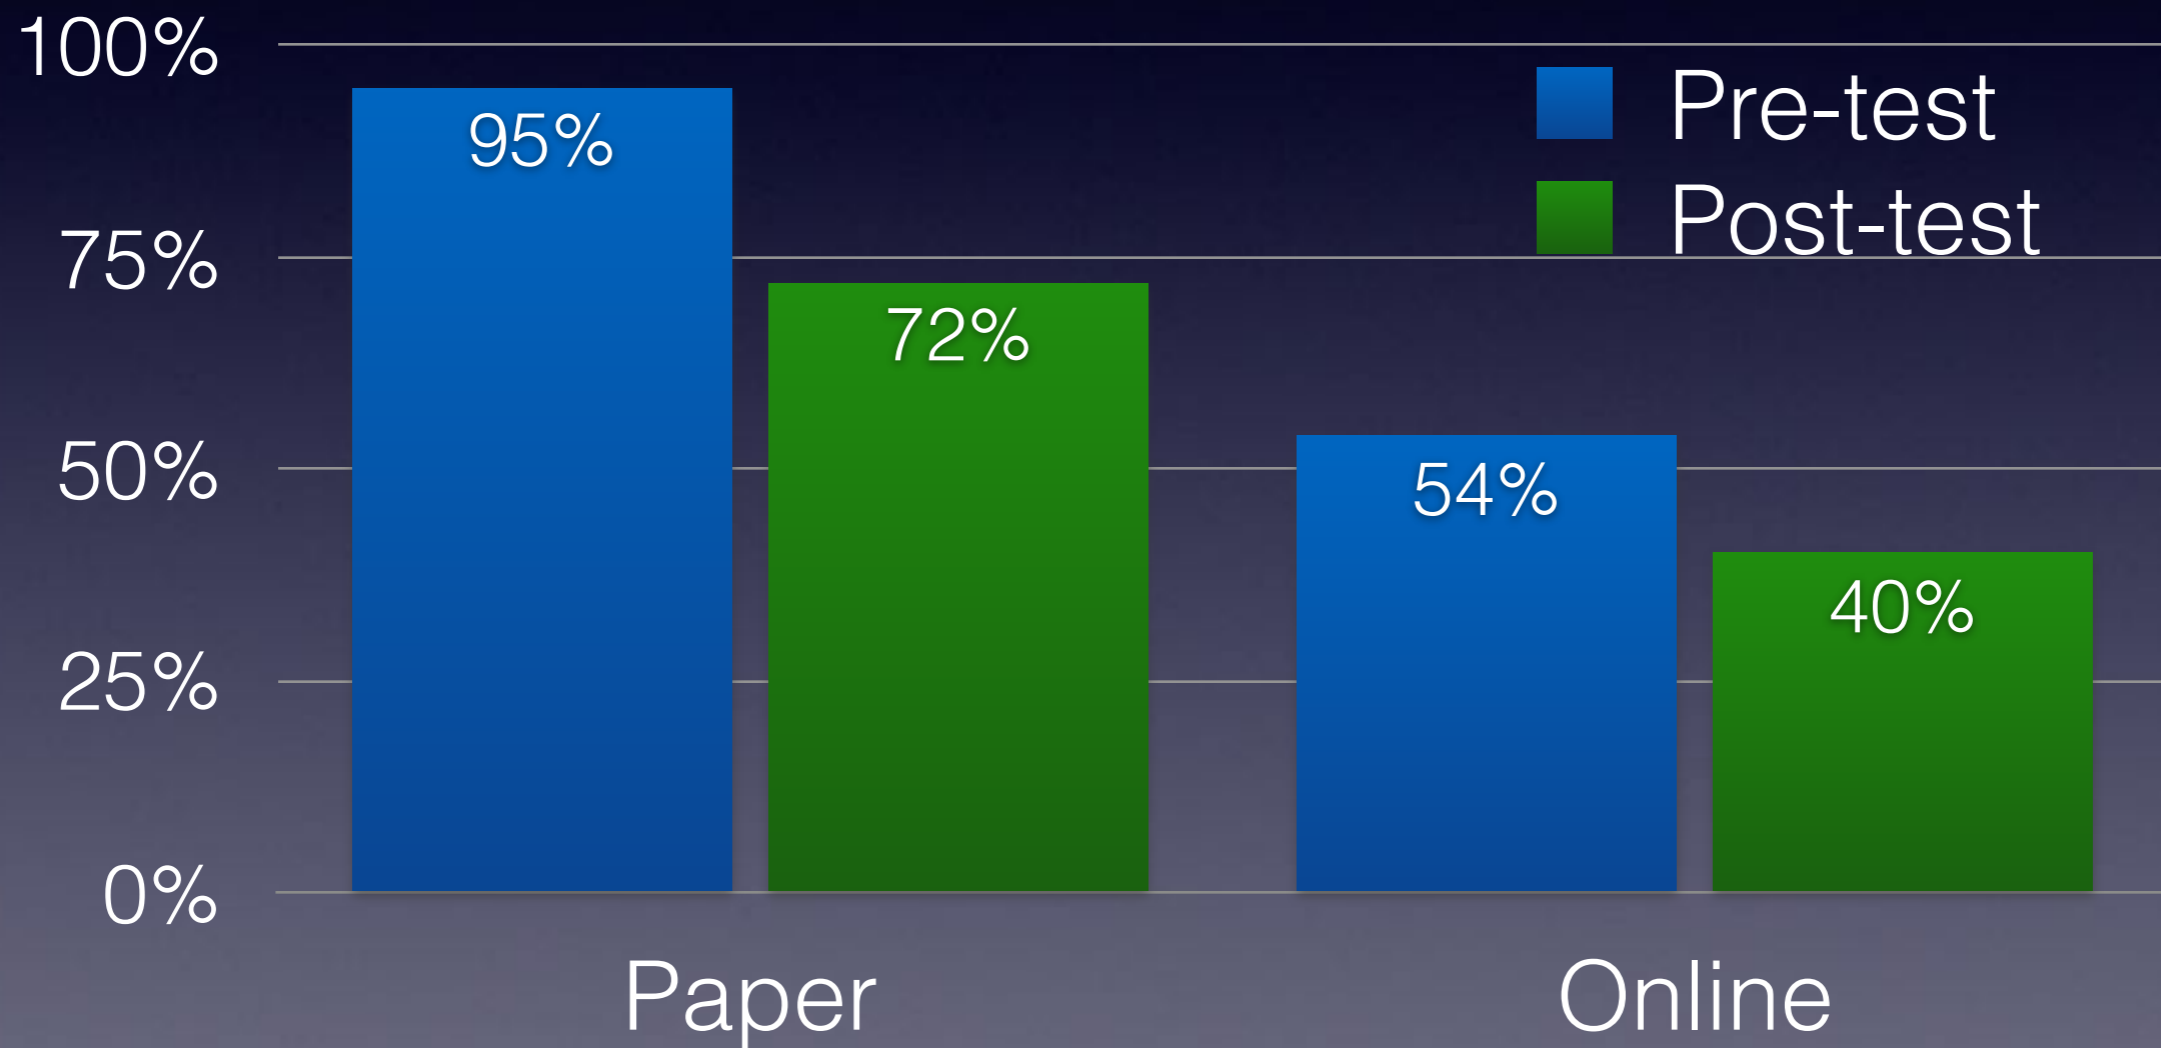

# Data Analysis #1

1. 5 physics classes at large midwest university
2. Stratified random sampling into 2 conditions

# Data Analysis #1

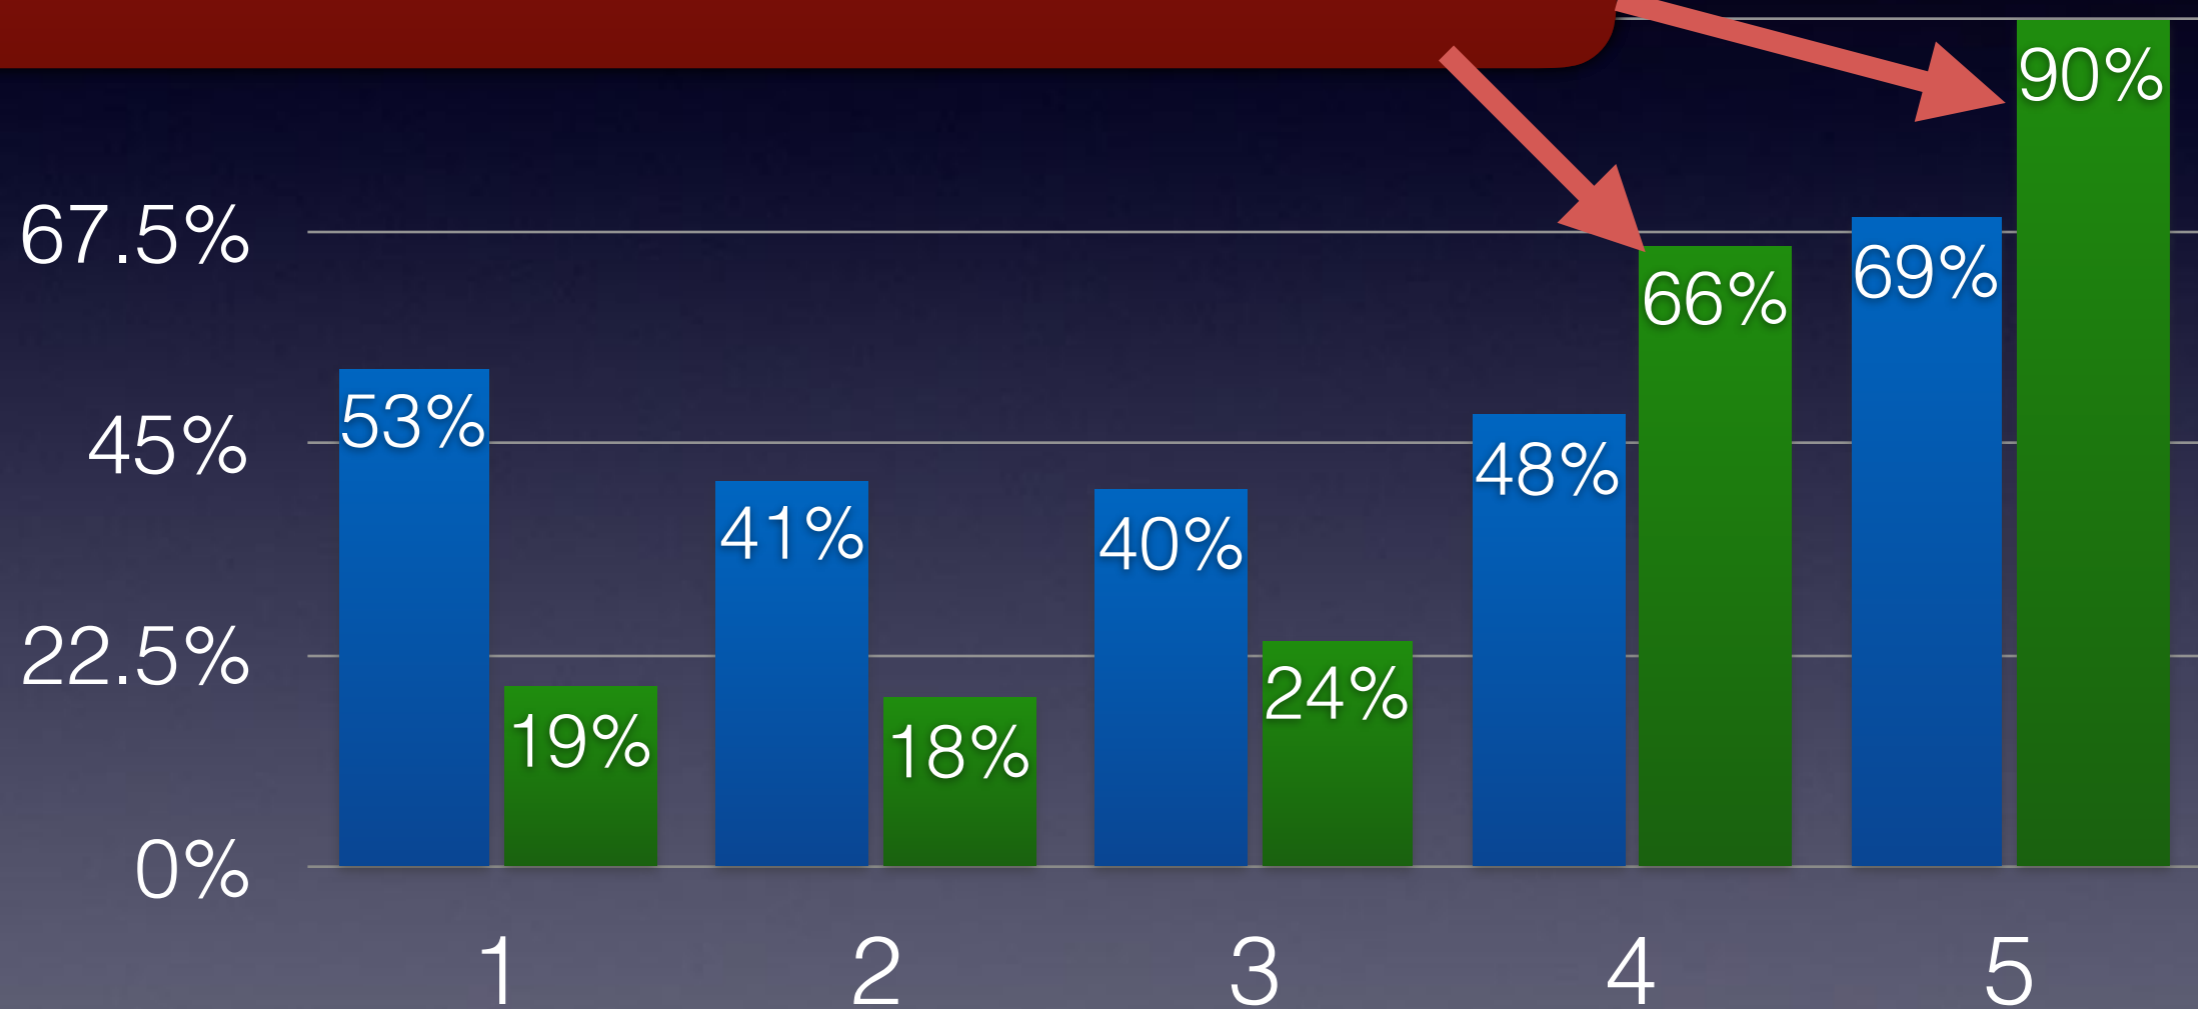

## Participation Rates

Jariwala, M., White, J.S.S, Van Dusen, B., Close, E. (in press). In-class vs. Online Administration of Concept Inventories and Attitudinal Assessments. *2016 PERC Proceedings*.

1. Multiple reminder Emails
2. Extra credit for participation

Pre-test  
Post-test  
Rates

# Data Analysis #2

## Physics Concept Inventories

- Pre & post scores collected at beginning and end of term.
- FCI, FMCE, CSEM, BEMA
- Calculate Cohen's d

$$d = \frac{\text{Post} - \text{Pre}}{\text{Class S.D.}_{\text{pooled}}}$$

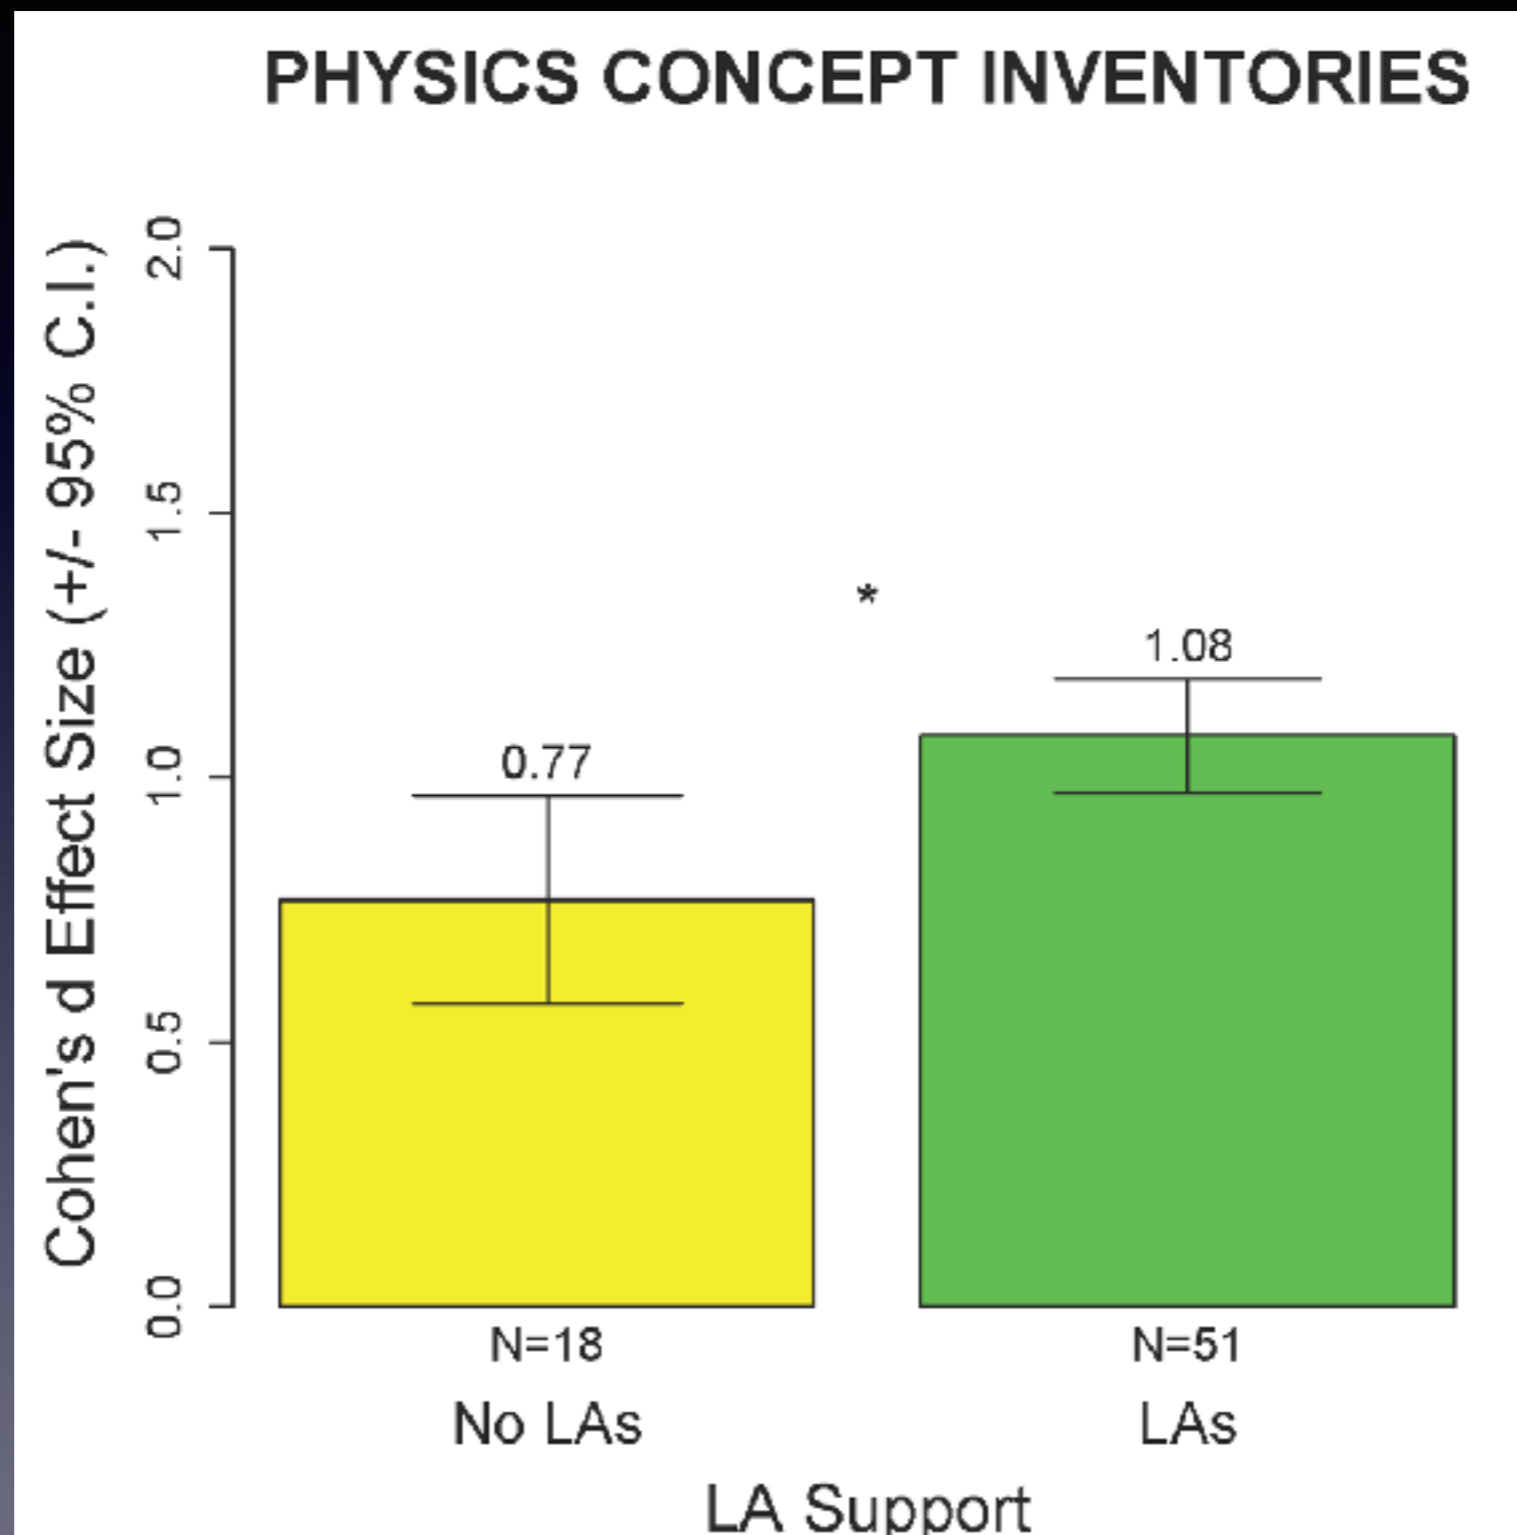

## Data Cleaning

- More than 80% answered
- Paired Tests Only (Cohen's d)
- Courses with > 10 Paired Tests
- Cut scores < -1.0 and > 4.0

**TABLE I.** Cleaned Data Counts (LASSO).

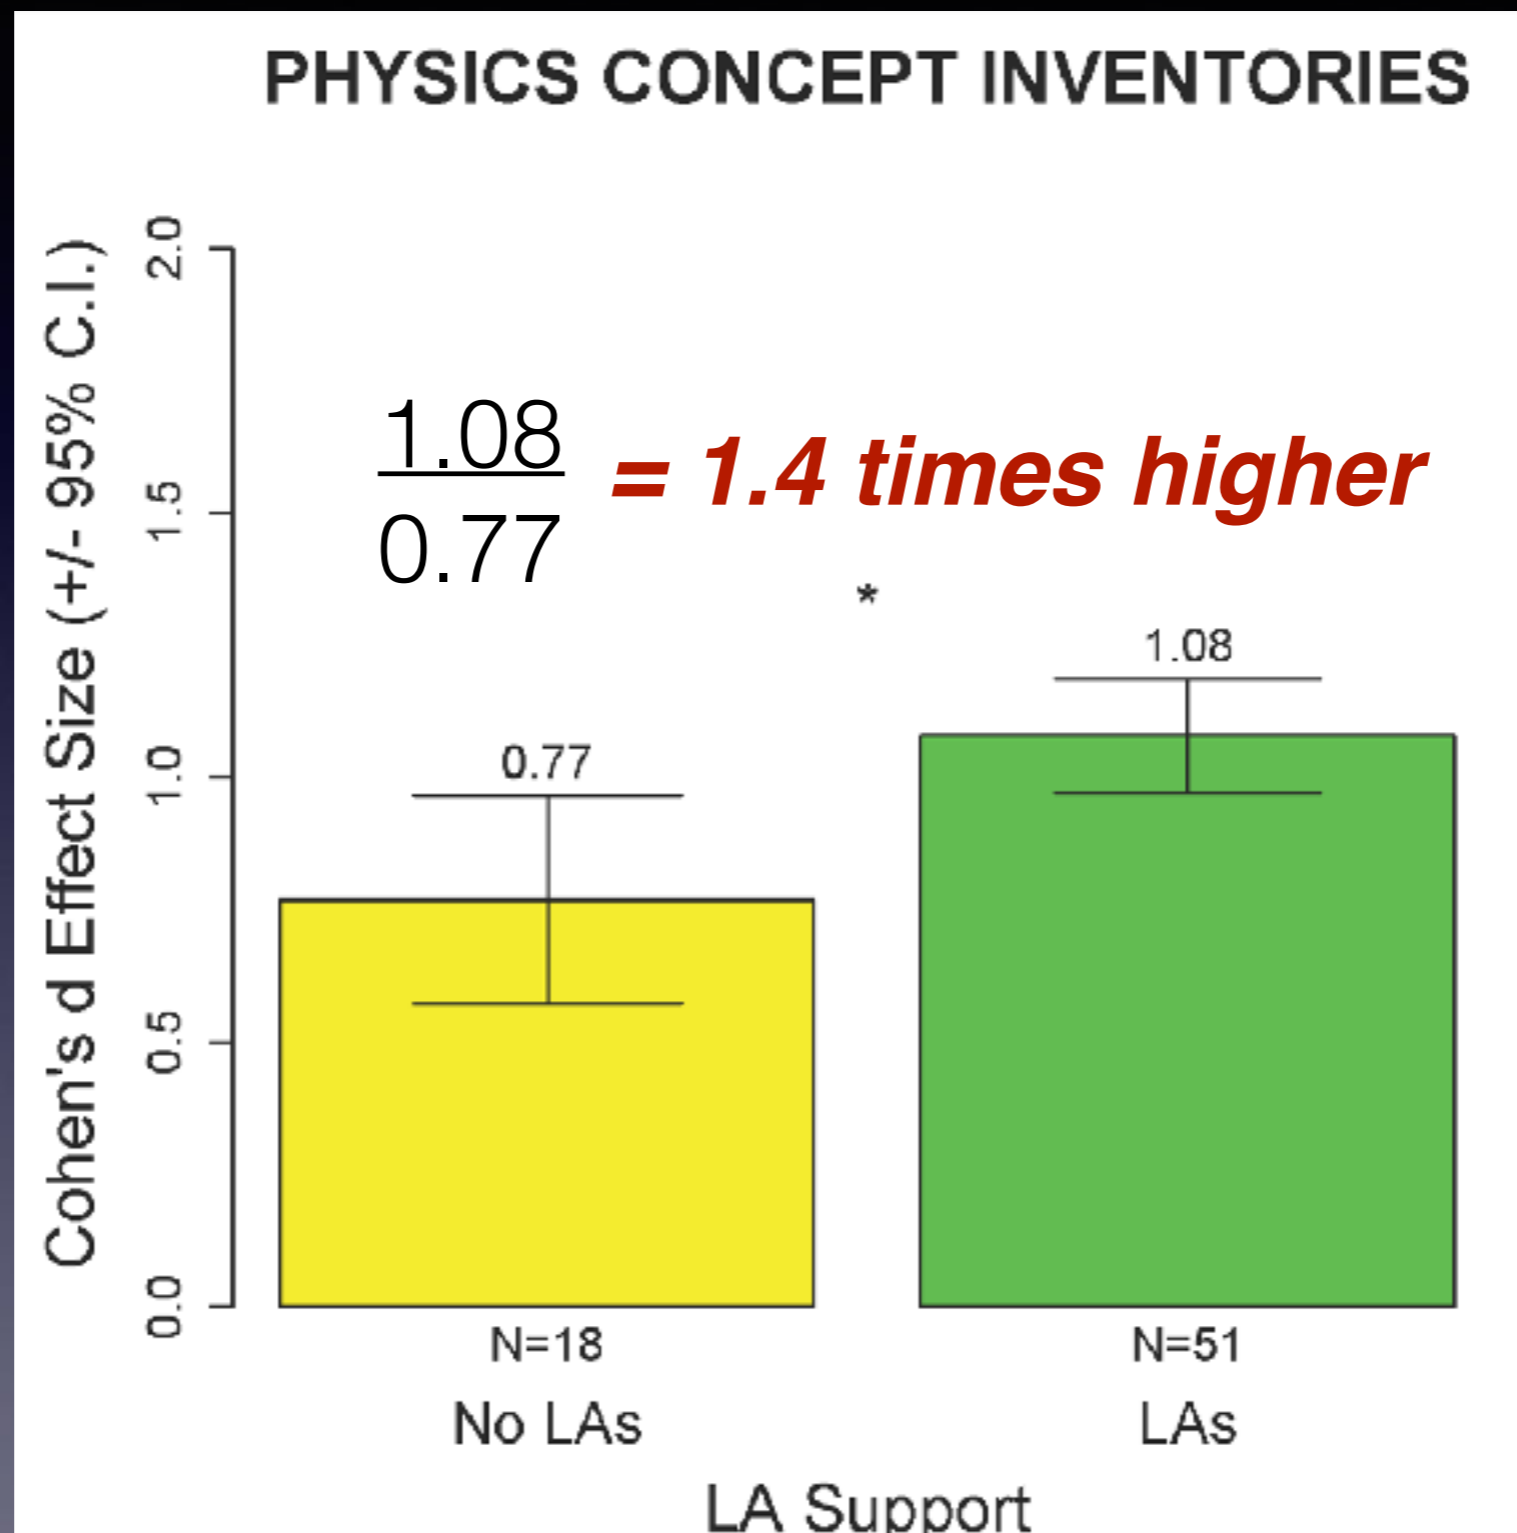

C.I.	Institutions	Courses	Students
FCI	9	26	697
FMCE	9	15	1,592
BEMA	4	7	680
CSEM	4	21	754
<b>TOTAL</b>	17	69	3,753

# Results: Impact of LA Support

White, J.S.S, Van Dusen, B., Roualdes, E. (in press). The Impacts of Learning Assistants on Student Learning of Physics. *2016 PERC Proceedings*.

# Results: Impact of LA Support

White, J.S.S, Van Dusen, B., Roualdes, E. (in press). The Impacts of Learning Assistants on Student Learning of Physics. *2016 PERC Proceedings*.

# Data Analysis #3

## Data Cleaning

- >80% answered
- matched pre-post tests
- >10 matched sets in course
- $-2 < d < 4$

dominant = white or asian,  
non-hispanic, males

Instrument	Institutions	Courses	Students (%non-dom)
FCI	9	31	1,045 (41%)
FMCE	8	15	1,253 (73%)
CSEM	2	21	784 (46%)
<b>Total</b>	<b>19</b>	<b>67</b>	<b>2,982 (55%)</b>

# Performance gap

$$\text{Gap} = d_{\text{non-dom}} - d_{\text{dominant}}$$

White, J.S.S, Van Dusen, B., Roualdes, E. (in press). The Impacts of Learning Assistants on Student Learning of Physics. *2016 PERC Proceedings*.

# Performance gap

$$\text{Gap} = d_{\text{non-dom}} - d_{\text{dominant}}$$

White, J.S.S, Van Dusen, B., Roualdes, E. (in press). The Impact of Learning Assistants on Inequities in Physics Student Outcomes. *2016 PERC Proceedings*.

# Future Research

More Data!

LASSO =

- (1) Free
- (2) Easy to use
- (3) Saves you time
- (4) Awesome reports
